EDUCATION

B.Tech in Computer Science and Engineering

Expected 2027

K.L. University

CGPA: **9.06 / 10**

SKILLS

Languages: Python, Java

Libraries/Tools: NumPy, Pandas

Web Technologies: HTML, CSS, React

Backend: Spring Boot

Databases: SQL

Core Concepts: Data Structures & Algorithms, OOP

Version Control: Git

PROJECTS

Task Management System (Full Stack Web Application)

- Developed a full stack application using React, Spring Boot, and SQL to manage user tasks efficiently
- Implemented secure user authentication and role-based access control (admin/user)
- Designed CRUD operations with deadline tracking and real-time progress calculation (completion percentage)
- Built RESTful APIs and integrated database for persistent task storage

Twitter Election Sentiment Insight System

- Built a sentiment analysis system using Python and machine learning techniques on textual data
- Performed data preprocessing and feature extraction using Pandas and TF-IDF
- Trained classification model to categorize sentiments (positive, negative, neutral)
- Developed interactive dashboard using Streamlit for visualization of insights

Student Management System (Python)

- Developed a console-based system using Python for efficient student record management
- Utilized dictionaries for optimized data storage and retrieval
- Implemented functionalities including add, update, and delete operations

ACHIEVEMENTS & CERTIFICATIONS

- Solved **550+** problems on [CodeChef](#), strengthening data structures and algorithmic problem-solving skills
- Participated in Guidewire DEVTrails Virtual Hackathon
- Completed Deloitte Data Analytics Virtual Internship Program
